

Figure 1 illustrates the design of a pedestrian network, showing a map of a neighborhood and three isometric views of pedestrian infrastructure.

The map shows a neighborhood with streets labeled: 대동로 (Dae-dong-ro), 충무로 (Jung-mu-ro), 고종로 (Go-jong-ro), and 동대문로 (Dong-daemun-ro). The map also shows a pedestrian network with red and blue lines.

The three isometric views show:

- Pedestrian Overpass:** A red arrow indicates a pedestrian path crossing a road.
- Neighborhood Commercial Facilities:** A red arrow indicates a pedestrian path through a commercial area.
- Community Center:** A blue arrow indicates a pedestrian path through a community center area.
- South - North Pedestrian Axis:** An orange arrow indicates a pedestrian path running north-south.
- East - West Pedestrian Axis:** An orange arrow indicates a pedestrian path running east-west.
